To start with, there’s the fact that we genuinely care about each and every customer. Some people may think that customer service is a thing of the past. We definitely don’t. As a family-owned, family-run business, it’s at the heart of everything we do.

Then there are our exacting standards of craftsmanship and quality that are unmatched in the upholstery industry. It simply has to be perfect, and there can never be any room for compromise.

The bespoke nature of our work is so very intrinsic to our offer. We have the flexibility to craft our own frames that then form beautiful, individual pieces for both retail and interior design clients.

Perhaps it can all be best summed up in one word: Passion. A passion for creating exquisite, classic and contemporary upholstered furniture that our customers love - and will go on loving for years to come.

Even in today’s mass-produced world, there will always be a place for traditional craftsmanship and quality. At Whitehead Designs, we believe that place should be your home. Choose from a wealth of design features, different measurements and a near endless palette of fabric textures and colours, and then trust our mastery and experience to craft a timeless classic based on your exacting specifications. From contemporary chic to traditional elegance, we can style your desires into the perfect piece. As you place it centre stage in your home, you can enjoy your Whitehead sofa in the full knowledge that it comes with a lifetime guarantee. The result, as our customers have told us for more than three decades, is perfection.

Timeless craftsmanship.
Uniquely beautiful.
We pride ourselves on the flexibility and excellence we offer in our products and service. Each piece of our upholstery is a unique work of art, because it represents a great deal of self-expression of the artisans who made it, but more importantly the self-expression of you, the owner. We hope your furniture will bring you lifelong satisfaction and enjoyment.

Frames are made in our own mill from carefully selected hardwoods with joints glued, screwed and dowelled for maximum strength.

All frames are lined out with webbing and hessian to give additional protection to your carefully selected face fabric.

Arms and backs are contoured from layers of traditional upholstery materials (hair, felt, fibres, etc.) to give a smooth finish.

By combining various coil spring tensions in the majority of our seats, optimum comfort and support is achieved.

Our coil-sprung seats are traditionally finished with hair-stuffed, hand-stitched front edges for lifelong durability.

Either flat springs or coil springs are used in the backs of our furniture for lasting posture support.

All fabrics are hand cut and pattern matched for that impeccable tailored look.

A choice of duck feather and down, hollofibre, foams and feather jacket cushions, amongst many others are offered to help you achieve the support and comfort level that is right for you.

Cushions are zipped, overlocked and pattern matched both sides for ease of cleaning and maximum wear.

Each piece is traditionally upholstered by a skilled craftsman and inspected at six stages during manufacture to guarantee you receive the highest quality finish possible.

To ensure that your upholstery arrives in perfect condition, the majority of our deliveries are carried out using our own transport and experienced staff.

Headboards

All our headboards are generously padded with a rolled-back edge to hide the fixings when pushed to the wall. Headboards can be made with or without a border except Style C, which can only be plain. Borders can be plain or ruched. We do not recommend having a ruched border when a checked or striped fabric is selected. We offer six standard shapes but can make to any design, shape and size required.

Sofa beds

Produced with your safety and comfort in mind, all frames are made from carefully selected hardwoods for maximum strength. We use a three-fold safety bed action that has to be opened and closed from the foot of the bed.

Bed actions are available in a single or double bed size, sleeping comfort is supplied by a four inch interior sprung mattress that can be reversed for maximum wear.

When the bed is open, the seat or back cushions can be stored behind the head of the mattress to form a bed head.

Comfort is supplied by dacron-wrapped foam seat cushions and feather back cushions. Please note that unlike standard sofas, sofa beds can only be varied in height and width if required, not in depth.

- **ANTIQUE BRASS**

Available on selected models only.
Rebuild

Not so much re-upholstery as complete rejuvenation.

Original drop-arm sofa in need of some attention.
Rebuild

Some people are quite happy to simply cover a multitude of sins. Not us. Just re-upholstering your old furniture is like papering over the cracks. The cracks are still there. We prefer to strip the whole beloved piece back and build it up again into its former glory. Our craftspeople will literally be rebuilding a piece of your family history, ensuring that there are many future years of joy to match the cherished memories.

To give your furniture a whole new lease of life we need to strip it right back to the frame. We’ll then tighten it, replace or readjust the springs and restuff and reshape the insides. If originally hand lashed, we will again use this traditional technique to secure the springs. We’ll then lovingly re-upholster the piece before delivering it back to you in our own vehicle, for you to welcome it like a long lost family member.

The completed masterpiece without buttoning at customer’s request.
Cushion fillings

As previously mentioned, the comfort of a high quality sofa or chair comes mainly from seat springs. Although different cushion fillings will affect the way they sit, cushions are primarily there to supply posture support. We have selected what we believe to be the best standard filling materials to provide optimum support for each model, allowing the springs to do their job. However, some fillings take more maintenance than others, so here is a brief description of each.

Duck feather & down

The best filling for moulding around you and giving posture support. Even if you decide on a different filling for the seat interiors, we would strongly recommend that you have this filling in the back cushions for optimum support. We use a mixture of duck feathers and duck down for extra softness. Because you sit ‘in’ feathers, rather than ‘on’ them, they let the springs perform perfectly. However, in order to keep their loft, feathers need daily plumping. If plumped daily, they will give years of satisfaction.

Hollofibre

Hollofibre is a man-made fibre that will again give excellent posture support. It does not have quite the same moulding properties as feathers and therefore you will tend to sit more ‘on’ it than ‘in’ it. Because of this, you will sit slightly firmer and higher on Hollofibre than Feathers. This filling should be plumped and turned regularly for maximum life.

Hollofibre/Feather jacket

A thick foam core with a hollofibre or feather pad on the top and on the bottom. This cushion provides a firmer sit than hollofibre or feather alone, but gives more bounce due to the foam core. This cushion will maintain its shape with minimal maintenance (just turning once a week).

Foam

A choice of luxurious firm or soft sitting foam which provides a neat finish and very little maintenance. We are able to change standard interiors to others. For further information contact the sales office on 0115 972 5056.

Additional Specifications

We are a bespoke manufacturer and all our models can be varied in terms of size and finish to suit the customer. We are also able to alter the shape of some models to fit a particular design.

Duck feather & Down
